

# SCOoffice MAIL SERVER

SCOoffice Mail Server combines the Microsoft Outlook® compatibility users need with the built-in reliability and ease of use customers expect, and is priced at a fraction of the cost of Microsoft Exchange™. The result is a rock solid, affordable, and complete mail and collaboration solution.

## COMPATIBLE

SCOoffice Mail Server is specifically designed to be compatible with Microsoft Outlook and other popular mail clients. It comes pre-configured to support mail, enhanced address book, and busy-free calendar features of popular messaging readers. As a result, businesses can deliver complete messaging and time management without any user retraining or desktop software updates.

When used with Microsoft Outlook, SCOoffice Mail Server adds essential collaboration with shared calendar, folders, and global address book features. Further, the simple Outlook interface enables users to quickly set up shared resources without technical assistance.

## RELIABLE

Known worldwide for providing key infrastructure for the day-to-day business operations of internationally recognized organizations, such as McDonald's and NASDAQ, SCO has built its reputation around the reliability of its software. This tradition continues with SCOoffice Mail Server which today powers organizations in the local government, retail, and manufacturing sectors; organizations such as the City of Pacific Grove in Northern California, Michael's – The Arts and Crafts Store, and Pallet One, the largest manufacturer of wooden pallets in the United States.

## EASY TO USE

Day-to-day mail server administration should not require a specialized system administrator and expensive training. SCOoffice Mail Server provides office staff with a browser-based Server Manager designed to be used by anyone, from administrative assistants to dedicated help desk personnel. No special training is required. Simple-to-use interfaces are provided for every day tasks such as adding users and managing mailing lists.

SCOoffice Mail Server also includes an easy-to-use User Preferences Manager. With this tool, end-users can set local mailing lists, spam protection, forwarding, vacation alerts, and passwords right from their Web browser without help from a designated administrator.

## SCOoffice MAIL SERVER 2.0 FEATURES

### COMPATIBLE

- Advanced, scalable, full-featured Internet mail server
