1	**Description**
2	**Availability**
3	**Dependencies**

Visit www.sco.com for more information about other products and support services from SCO.

1   Product Description

Adobe Flash Player Version 7.0.68.0 provides OpenServer 6 customers with access to the recognized standard for delivering high-impact, rich Web content and when coupled with the 4Front OSS Supplement it provides the full range of capabilities needed to display truly rich web content including streaming audio and video.

2   Availability

Downloading of the Flash Player Supplement from the World Wide Web is immediately available at no charge for current OpenServer 6 customers. The supplement along with a detailed description of its contents and installation instructions can be found on the SCO Support Download site as follows:

http://www.sco.com/support/update/download/release.php?rid=217 or via FTP at:

ftp://ftp.sco.com/pub/openserver6/600/other/flash.7.0

3   Dependencies

The new Flash Player Supplement for OpenServer 6 requires the prior installation of Maintenance Pack 2. For sound support it requires the installation of the 4Front Open Sound System ^{TM} (OSS) Supplement. This supplement should be installed prior to installing the Flash Player Supplement.

Detailed installation instructions are included in the release notes which should be read before installing the software.
