MPlayer for UnixWare 7.1.4 and SCO OpenServer 6

9 March 2007: SCO announces World Wide Web availability details for the Mplayer Supplement for UnixWare® 7.1.4 and SCO OpenServer™ 6 This announcement includes:

1   Description
2   Availability
3   Dependencies

Visit www.sco.com for more information about other products and support services from SCO.

1   Product Description

The MPlayer provides support for many standard digital video formats including AVI, MPEG, Quicktime, FLC/FLI, and WMV. With this supplement UnixWare 7.1.4 and OpenServer 6 customers will have more flexibility in configuring their systems to support a wide range of video capabilities.

Note that this version does not support the playing of DVDs.

For a full list of the features available with MPlayer see the documentation included with the supplement.

2   Availability

Downloading of the MPlayer Supplement from the World Wide Web is immediately available at no charge for current OpenServer 6 and UnixWare 7.1.4 customers. The supplement along with its installation instructions can be found on the SCO Support Download site as follows:

For OpenServer 6

http://www.sco.com/support/update/download/release.php?rid=270 or via FTP at:

ftp://ftp.sco.com/pub/openserver6/600/other/mplayer.1.0

For UnixWare 7.1.4

http://www.sco.com/support/update/download/release.php?rid=271 or via FTP at:

ftp://ftp.sco.com/pub/unixware714/mplayer_1_0

3   Dependencies

The MPlayer supplement for OpenServer 6 requires Maintenance Pack 2 which should be installed prior to installing the MPlayer Supplement.

For UnixWare 7.1.4 the MPlayer supplement requires the prior installation of libpng version 1.2.7 which is contained in the Maintenance Pack 3 set.

Detailed installation instructions are included in the release notes which should be read before installing the software.
