4 March 2009: SCO announces availability details for the GNU Utilities Supplement for all SCO OpenServer 6 customers. This announcement includes:

1	**Description**
2	**Availability**
3	**Contents**
4	**Supported Platforms**

Visit www.sco.com for more information about other products and support services from SCO.

1   Product Description

The GNU Utilities Supplement represents the initial supported release of a selection of key GNU utilities for OpenServer 6. With these key utilities customers will be able to more easily port and develop open source products and customer specific applications for OpenServer 6 using the native C and C++ Development System. It will also allow active participation in open source development projects and deployment of updated releases of those projects based on customer specific schedule requirements

2   Availability

Current OpenServer 6 customers can download the GNU Utilities Supplement immediately at no charge. The Supplement along with a detailed description of its content and installation instructions can be found on the SCO Download site at**:**

http://www.sco.com/support/update/download/release.php?rid=382

 It may also be obtained from SCO's FTP site at:

 ftp://ftp.sco.com/pub/openserver6/600/other/gnuutils.mp4.

Customers are advised to read the installation instructions prior to installing the Supplement.

3   Contents

The GNU Utilities Supplement contains utilities which are the minimum requirement to port, compile and test open source applications, libraries and tools for deployment on an OpenServer 6.0.0 system using the native (C/C++) Development System. The following is a partial list of the contents of the GNU Utilities Supplement:

- GNU make Utility

- GNU Macro Preprocessor

- GNU awk Text Processor

- GNU Parser Generator

- GNU Documentation Tools and Browser

- GNU automake Utilities

- GNU autoconf Utilities

- Fast Lexical Analyzer Generator

For a complete detailed list of the contents of the GNU Utilities Supplement see the Release Notes which also contain detailed installation and usage instructions.

4 Supported Platforms

This release of the GNU Utilities Supplement is supported only on OpenServer 6.0.0 with Maintenance Pack 4 (MP4) or later installed.

Attempts to install this release on earlier OpenServer 6 releases may result in a conflict of ownership of files between this component and other components on your system.
