

WINNING WITH SCO PROFESSIONAL SERVICES

Providing Innovative Solutions in today's ever-changing marketplace ...

SCO Professional Services provides expert advice for designing and deploying IT solutions. After more than two decades of planning and implementing deployment strategies, SCO has gained a stellar reputation as industry-leading consultants with professionalism, problem-solving skills, creative and innovative solutions, and attention to detail.

SCO Global Services team, consisting of Professional Services, Web services, Education and Support, has the expertise you need to align your IT vision and business success. Whether we are working directly with one of our strategic partners, corporate accounts, or consultants, our integrated consulting and support services give you a competitive edge.

We work closely with your in-house MIS department, resellers, or consultants to create and deploy an IT strategy that incorporates both advanced technology and bulletproof reliability, all while saving you time and money!

WEB SOLUTIONS

SCO Web Solutions help customers take advantage of the power and flexibility of Service-Oriented Architectures (SOAs) to build real-time business solutions - leveraging open standards to reduce costs, mitigate risk and accelerate time-to-market.

ASSESSMENT SERVICES

Detailed analysis and evaluation of business applications, architectures, databases, and platforms associated with a new integration, migration or application development project.

ARCHITECTURE & DESIGN SERVICES

Expert guidance on how to effectively apply proven service-oriented architecture and agile design approaches essential in creating reliable, scalable and secure Web-based business applications.

DEVELOPMENT & IMPLEMENTATION SERVICES

Assistance in the rapid development and low-risk implementation of Web applications leveraging experience, industry standards, including Web Services and advanced development process methodology.

INTEGRATION & DEPLOYMENT SERVICES

Technical expertise applied to integrating and deploying enterprise-level Web applications including data integration within a SOA.

MIGRATION SERVICES

Effectively and quickly migrate existing legacy and character-based applications to the Web leveraging Web Services.

MENTORING SERVICES

Access to respected industry professionals and experienced consultants providing guidance, best practices and in-depth knowledge related to application architecture, development, integration, migration and deployment.

PROFESSIONAL SERVICES

A dedicated Professional Services team provides consulting, integration, implementation, optimization and upgrade services for customers creating the real-time enterprise.

SERVER ARCHITECTURE, DEPLOYMENT AND MANAGEMENT

Designing and configuring the right server platform for your business problem is at the core of our expertise. Our highly skilled team not only has top notch technical expertise with UNIX®, and NT® servers, but an understanding of your business and industry to maximize your return on investment.

Server Design & Deployment: Planning the configuration, optimization and commissioning of application servers.

Server Replication Services: Configuration, replication and deployment of multiple servers for branch automation projects.

Migration Planning: Planning, designing, risk assessment and executing the migration of an existing application server to a new operating system revision or server platform.

Custom Engineering: Adding features or modifying existing server functionality to meet specific customer requirements. Customized distributions, drivers, and production of new installation and management software.

NETWORK ARCHITECTURE

Networking is at the core of any IT project and increasingly a critical part of a company's infrastructure. Our highly skilled consultants know the complex issues involved in designing, implementing, optimizing and managing network infrastructure, in addition to:

Network Architecture Design: Analyzing network requirements, designing solutions and project planning.

Network Infrastructure: Implementing the network infrastructure and optimizing performance.

Security and Firewalls: Analyzing the security requirements and current infrastructure. Designing and deploying appropriate security software and methodologies.

Network Management Analysis: Analyzing current network management practices, recommending new practices and tools to ensure best practice and implementation of recommended tools and systems.

EMBEDDED SYSTEM DEVELOPMENT

Creating dedicated and application optimized systems is a complex art. We have helped our customers create customized system platforms dedicated to the function or application selected, including point-of-sale devices, thin clients, appliances, small footprint or function-specific servers, and embedded devices.

ABOUT SCO GLOBAL SERVICES

The SCO Global Services team has over 20 years of experience with UNIX and Linux technologies with unrivaled service and technical expertise. Our Web Solutions practice provides high business value for integration projects of all sizes to transform your business processes and deliver ease of use, flexibility, and return on investment (ROI). We've saved companies in large retail, government, finance, and franchise operations, such as McDonalds, Save Mart and Cendant, thousands of hours and hundreds of thousands of dollars while improving customer satisfaction, reducing complexity, and increasing productivity.

Each engagement follows a methodology that involves an initial study phase to analyze the application, risk assessment and construct recommendations, and a detailed proposal. The SCO engineering team will carry out the development process while working with your in house team.
